

0.0 0.2 0.4 0.6 0.8 1.0

Figure 1: A line graph showing a decreasing trend over 100 steps. The y-axis is labeled from 0.0 to 1.0 in increments of 0.2. The x-axis represents 100 discrete steps. The data is plotted as a series of vertical black lines, where the height of each line represents the value at that step. The values start at approximately 0.87 at step 1 and decrease steadily to approximately 0.60 at step 100. The decrease is most rapid in the final 20 steps.
